SUMMARY

Graduate student in Engineering Data Science and Artificial Intelligence at the University of Houston with experience in data analysis, database technologies, and web application development. Proficient in SQL, Python, Excel, and data-driven systems, with hands-on experience analyzing datasets and developing web-based applications. Strong problem-solving and troubleshooting skills with an interest in supporting technology, software, and data initiatives within the University of Houston Graduate School.

EDUCATION

M.S., Engineering Data Science and Artificial Intelligence

University of Houston, Houston, Texas

Aug 2025 – Present

GPA: 3.668/4.0

B.Tech, Computer Science Engineering (AI & ML)

Vellore Institute of Technology, Andhra Pradesh, India

Aug 2021 – May 2025

CGPA: 3.5/4.0

EXPERIENCE

- **Data Analyst Intern – Tech Autonetics**

Jan 2025 – May 2025

Analyzed and audited datasets to identify patterns, inconsistencies, and trends, supporting accurate reporting and data-driven decision-making. Used Python, Excel, and analytical techniques for data preprocessing, validation, analysis, and reporting.

- **MERN Full Stack Developer Intern – Ethnus**

Aug 2023 – Nov 2023

Developed and tested responsive web application features using React.js, Node.js, Express.js, and MongoDB in an Agile environment. Troubleshot application issues and collaborated with team members to improve functionality, usability, and application performance.

ACADEMIC PROJECTS

- **YOLOv10-Based Leukemia Detection System**

Developed and evaluated a YOLOv10 deep learning model for image classification, applying data preprocessing, model training, and performance evaluation techniques.

- **Image-Based Attendance System using Computer Vision**

Developed a real-time attendance system using Python, OpenCV, and facial recognition to automate classroom attendance tracking.

Integrated a secure database and user-friendly interface for attendance management, reporting, and record retrieval.

- **Few-Shot Voice Classification System**

Developed a few-shot learning model to classify speakers using a limited number of audio samples.

Applied audio preprocessing and neural-network-based feature extraction to support speaker identification and voice-matching applications.

TECHNICAL SKILLS

Data & Databases: SQL, Advanced Excel, MySQL, MongoDB, Data Analysis, Data Auditing & Reporting

Programming: Python, Java, JavaScript

Web Technologies: HTML, CSS, React.js, Node.js, Express.js

Analytics: Pandas, NumPy, Power BI, Tableau

Tools: Git, Jupyter Notebook, VS Code
